

STEPHANIE A. ALLEN

College Park, MD

[Google Scholar](#) ◊ [LinkedIn](#) ◊ <https://sallen7.github.io/>

EDUCATION

Ph.D. Applied Mathematics, Statistics, and Scientific Computation, University of Maryland, College Park
Scientific Computing Track, Expected Summer/Fall 2022

GPA: 4.0/4.0

M.S. Applied Mathematics, Statistics, and Scientific Computation, University of Maryland, College Park

August 2017 - May 2020

GPA: 4.0/4.0

B.A., State University of New York (SUNY) Geneseo

Majors: Mathematics and Economics

Minor: Edgar Fellows Honors Program

August 2013 - May 2017

GPA: 4.0/4.0, *Summa cum laude*

SKILLS

Technical Skills	Optimization, Operations Research, Scientific Computation, Statistics
Computing Languages	Python & MATLAB (Intermediate)
Software & Tools	LaTeX (Intermediate), Excel (Beginner)

PUBLICATIONS

Allen, Stephanie, Steven A. Gabriel, and John P. Dickerson. "Using inverse optimization to learn cost functions in generalized Nash games." *Computers & Operations Research* (2022): 105721.

Allen, Stephanie, Daria Terekhov, and Steven A. Gabriel. "A Hybrid Inverse Optimization-Stochastic Programming Framework for Network Protection." *arXiv preprint arXiv:2110.00488* (2021).

Allen, Stephanie. "A Two-Stage Vehicle Routing Algorithm Applied to Disaster Relief Logistics after the 2015 Nepal Earthquake." *SIAM Undergraduate Research Online (SIURO)* (2018).

Allen, Stephanie, David Madras, Ye Ye, and Greg Zanotti. "Change-point detection methods for body-worn video." *SIAM Undergraduate Research Online (SIURO)* (2016).

SELECTED PRESENTATIONS

"Using Inverse Optimization to Learn Cost Functions in Generalized Nash Games," INFORMS 2021, October 2021.

"A Hybrid Inverse Optimization-Stochastic Programming Framework for Network Protection," INFORMS 2020, November 2020.

"Working in Reverse: Inverse Optimization Methods for Pyomo in Online Settings," INFORMS 2019, October 2019.

"Working in Reverse: Inverse Optimization in Pyomo," Joint Mathematics Meetings 2019, January 2019.

RESEARCH EXPERIENCE

Johns Hopkins University Applied Physics Laboratory

May 2018 - Present

Graduate Student Intern

- Worked on problems involving data fusion and modeling
- Responsible for developing new algorithms and models for Lab problems
- Written technical reports for the Lab about research
- Supervised a college student on a statistics project during Summer 2018

Institute for Pure and Applied Mathematics (IPAM) at UCLA

June 2016 - August 2016

Research in Industrial Projects for Students (RIPS) LAPD Team Project Manager

- Collaborated on a two-stage framework to detect salient changes in LAPD body-worn video
- Developed and implemented via MATLAB statistical methods/algorithms to detect significant shifts in time series data
- Supervised team progress, represented the team in RIPS program meetings, and interfaced with LAPD sponsors as the team's Project Manager
- Published paper through SIAM Undergraduate Research Online (SIURO) entitled, "Change-point Detection Methods for Body-Worn Video"

- Presented at the 2017 Joint Mathematics Meetings and the 2017 Nebraska Conference for Undergraduate Women in Mathematics (NCUWM)

Social and Decision Analytics Laboratory at Virginia Tech

May 2015 - August 2015

REU Summer Student Fellow

- Evaluated/contacted data sources and found literature for the Lab's Census Bureau Project
- Applied statistical methods via R and Excel to Census datasets with the research goal of identifying demographic groups overrepresented among the impoverished in Arlington County (dplyr and survey packages)
- Prepared working paper based on results from this independent research entitled, "Overrepresentation and Underrepresentation: Those in Need in Arlington County"

RESEARCH PROJECTS

Dissertation Project 1

January 2020 - February 2021

Using Inverse Optimization to Learn Cost Functions in Generalized Nash Games

- Extended a method in the inverse optimization literature to the case of generalized Nash equilibrium games
- Wrote extensive code for transportation problem numerical experiments to demonstrate the framework. Code can be found here: https://github.com/sallen7/IO_GNEP
- The arXiv paper can be found here: <https://arxiv.org/abs/2102.12415>

Dissertation Project 2

November 2019 - May 2021

A Hybrid Inverse Optimization-Stochastic Programming Framework for Network Protection

- Proposed that inverse optimization can be used to parameterize cost functions in multi-stage stochastic programs for disaster management and can be used in disaster support systems
- Undertook computational experiments with two different cost functions and two different road networks to illustrate this hybrid inverse optimization-stochastic programming framework
- The arXiv paper can be found here: <https://arxiv.org/abs/2110.00488>

Advanced Scientific Computing I-II

September 2018 - May 2019

Working in Reverse: Inverse Optimization Methods for Pyomo in Static and Online Settings

- Undertook as a two-semester long research project at UMD, College Park that examined inverse optimization methods
- Implemented state-of-the-art inverse optimization methods in Python
- To view the code for this coursework sequence, see https://github.com/sallen7/inverse_optimization

Mathematics Honors Capstone and Edgar Fellows Honors Thesis

Sept. 2016 - May 2017

A Two-Stage Vehicle Routing Algorithm Applied to Disaster Relief Logistics after the 2015 Nepal Earthquake

- Examined vehicle routing over the course of a two-semester senior thesis project at SUNY Geneseo
- Modeled the Himalayan Disaster Relief Volunteer Group's delivery of supplies after the 2015 Nepal Earthquake as a vehicle routing problem (VRP) using Fisher and Jaikumar's two-stage method, which allocates locations to vehicles via an integer program and then uses heuristics to route the vehicles
- Created scripts for data processing, graphics production, and LaTeX table production
- Results reiterated the open nature of the VRP and the computational necessity of heuristics
- Paper selected as a finalist for the 2017 INFORMS Undergraduate O.R. Prize Competition
- Presented at the Pi Mu Epsilon 2017 Conference and won the Mathematical Association of America Environmental Mathematics Special Interest Group Student Speaker Award

LEADERSHIP & SERVICE

Women in Mathematics (AWM Chapter at UMD, College Park)

August 2018 - May 2021

President, Vice-President, & Secretary

- Role as President (2020-2021): Manage all of the events undertaken by the organization including speaker, professional development, and social events
- Role as Vice President (2019-2020): Assisted the President with the logistics and planning for some of the speaker, professional development, and social events undertaken by the organization
- Role as Secretary (2018-2019): Took notes during meetings and contributed ideas regarding events

AMSC Program, UMD, College Park

August 2019 - Present

New Student Mentor

- Serve as a resource for 2-3 first year students in the AMSC Ph.D. program

- Attend events associated with the New Student Mentor program and provide advice to the students

University Senate, UMD, College Park

September 2019 - April 2020

Graduate Student Senator

- Reviewed and voted on new policies up for consideration in front of the University Senate

Food Security Advocates (FSA), SUNY Geneseo

September 2014 - May 2017

Co-Founder/President

- Oversaw all projects of FSA, a student organization focused on fighting hunger and food insecurity
- Developed partnerships and organized events with pertinent campus, non-profit, and government organizations
- Government Projects included coordinating and sustaining a Livingston County child nutrition program through administrative communications and end-of-semester food drives (six in total) and included running pre-screening clinics and outreach events for SNAP benefits
- Campus and non-profit events included assisting with the planning of the Geneseo Martin Luther King Day of Service, organizing and participating in speaker events regarding food insecurity, running a spice drive for a program that teaches cooking skills to low income individuals, running a cooking class with a youth program, and volunteer trips to a regional foodbank
- Served on the Martin Luther King Day of Service Committee and the Advisory Committee on Volunteer & Service Programs (which chooses recipients of service awards and discusses service on campus)

HONORS & AWARDS

AMSC Leadership Award

Spring 2021

Graduate Fellowship for STEM Diversity (GFSD)

Fall 2018 - Present

University of Maryland, College Park Flagship Fellowship

Fall 2017 - Present

Phi Beta Kappa

May 2016

SUNY Chancellor's Award for Student Excellence

Spring 2017

SUNY Geneseo Presidential Scholar

Fall 2016

PAPER REVIEWER

Economics and Computation 2021 (EC'21) 2021

Energy Systems 2020

CONFERENCE SESSION ORGANIZER

Learning and Equilibria Session INFORMS 2021
